

Quality Assurance Statement

Sure-Safe is a specialist provider of gas detection services throughout the United Kingdom. Our services include:

- The provision of fixed and portable gas detection.
- On site calibration & maintenance of fixed & portable gas detection.
- Turn key consultation, supply, installation & ownership support.
- Short & long term portable gas detection hire.
- Technical support
- & all other related areas of gas detection.

As gas detection is used for safety and analytical purposes we at Sure-Safe fully appreciate the importance of ensuring your equipment is maintained, calibrated and certified by competent technicians - lives and plant depend on it!

Thus, all of our personnel come from original equipment manufacturers, have certified factory training and access to an extensive technical library.

Additionally we exclusively utilise traceable calibration gases and install authorised spares and accessories. In sum you can be assured of the quality and dependability of Sure-Safe - we do not deal with anything but gas detection!

All our staff have worked for ISO 9000 accredited companies and a number have been involved with the implementation, management and review of the program.

Thus, although Sure-Safe does not currently have accreditation be assured our systems of work are simple, effective and attributable.

All companies who supply Sure-Safe gas detection equipment are ISO approved including Drager, Crowcon & MSA for whom we are agents.

The quality of our service has been recognised by many organisations from large multi national companies to regional government authorities.

Including Anglian Water, British Energy, General Electric, GKN, Sainsbury's and Tesco's.

Sure-Safe believes it offers an unparalleled service in terms of the provision of portable and fixed gas detection supply, service and support. However, we would be pleased to receive any comment that may allow us opportunity to improve in any way.

Gas Detection at its Best
